Model: DBM-70
Subject: DFC Collator Connection

We are please to announce that it is now possible to connect the DFC Collators to the DBM-70 Booklet Maker.

The new DBM-70's in Grey colour will have a revised Ski Plate to guide the paper from the Collator to the Booklet Maker. New Ski Plate Part No: 7.45

DCF Collator Installation

Communication Cable

The communication Cable currently supplied with the Stand assembly for DC-10 Mini Collators will require modification within the 9 Way 'D' Type Connector for connection to DFC Collators.

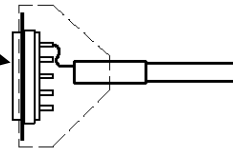

These cables will be modified in production, new cable part number: BK003E.

Connection should be made to the Collator's 9 way 'D' type socket on the Non-Operator side.

9 way 'D' Type Connector

9 way 'D' Type Pin Locations

Red Wire to Pin 1
 Blue Wire to Pin 2

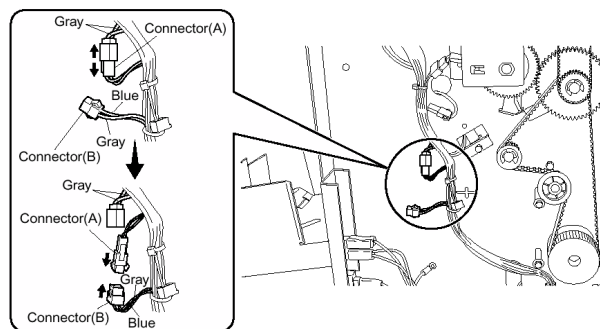

Ep-rom

DFC10 & 12 Collators will require an Ep-rom change to 11T-80300.

DFC Collator Set-up

Please refer to section 4 of the DFC Installation Manual; 'Re-Connect the Connectors'. Locate the respective connector within the Non Operator side panel and change the connections to Grey Blue to Grey Blue.

Maintenance Mode Settings
 Set Finishing Settings to 'DC-S4'

Operator Mode Settings
 Set On-Line Settings to 'Booklet Maker'
